

# Ahmed Mohamed Alaa

Frontend Engineer

Portfolio · AhmedAlaa21 · ahmedmohamedalaa96@gmail.com · +20 114-224-5739 · Alexandria, Egypt

## PROFILE

Frontend Engineer with 5+ years of experience building and shipping production-scale web and mobile applications across edtech, IPTV, e-commerce, and logistics domains. Deep expertise in React.js, Next.js, TypeScript, and React Native, with a strong track record of improving Core Web Vitals, reducing bundle sizes, and leading cross-functional delivery as a technical lead. Known for clean architecture, thorough code reviews, and translating ambiguous requirements into reliable, maintainable UIs at scale.

## WORK EXPERIENCE

### Frontend Engineer — XCodes (Full-time, Remote)

Nov 2025 – Present

Ajman, UAE

- Architected and deployed IPTV web applications on Tizen OS, establishing the component library and build pipeline used across all subsequent smart-TV projects.
- Delivered 4+ outsourced admin dashboards and marketing websites end-to-end, consistently meeting client deadlines and reducing post-launch bug reports by 35% through stricter code-review gates.
- Introduced performance budgets and lazy-loading strategies that improved Lighthouse scores from an average of 84 to 96 across client projects.

### Frontend Engineer — Tadarab (Full-time, Hybrid)

Oct 2023 – Nov 2025

Kuwait City, Kuwait

- Led frontend development of three flagship products — Live Tadarab (Next.js), Trainer Dashboard (React.js), and Tadarab for Business (React.js) — collectively serving 50,000+ active users.
- Improved SEO ranking for Live Tadarab by implementing SSR, structured data, and meta-tag strategies, driving a 28% increase in organic traffic over six months.
- Integrated Google Analytics 4 and Facebook Pixel across all products, enabling data-driven A/B testing that lifted course-completion CTR by 18%.
- Reduced average page load time by 40% through code-splitting, image optimisation (next/image), and memoisation of expensive render paths.

### Frontend Engineer — GuestNa (Part-time, Remote)

Nov 2023 – Nov 2025

Riyadh, Saudi Arabia

- Built and maintained a cross-platform React Native e-commerce trip-booking app targeting the Saudi market, successfully shipping releases to the Apple App Store and Google Play Store.
- Designed scalable booking-flow architecture with offline-first state management, reducing checkout abandonment by 22% on low-connectivity mobile networks.
- Collaborated directly with the product and backend teams in Agile sprints, cutting average feature-delivery cycle from 3 weeks to 10 days.

### Frontend Engineer — XCodes (Freelance, Remote)

Apr 2024 – Nov 2025

Remote

- Delivered targeted feature work and maintenance for IPTV and web projects outside the core full-time scope, maintaining zero critical regressions across all releases.

### Frontend Engineer — American Cosma (Freelance, Remote)

Jul 2023 – Dec 2023

Cairo, Egypt

- Developed a B2B e-commerce frontend in React.js, delivering a scalable product-catalogue and order-management interface adopted by 12 business clients at launch.
- Built a real-time logistics dashboard for transport monitoring, integrating REST APIs and WebSocket feeds to surface live fleet status to operations managers.

### Frontend React Developer — DigiMile (Freelance, Remote)

Feb 2023 – Dec 2023

Giza, Egypt

- Built and maintained responsive React.js web applications for multiple client accounts, achieving consistent cross-browser compatibility across Chrome, Safari, and Firefox.
- Integrated RESTful APIs to power dynamic data visualisations, reducing manual reporting effort for clients by an estimated 6 hours/week.

### Frontend Engineer — Badgewell (Full-time, Hybrid)

Feb 2021 – Jul 2023

Giza, Egypt

- Owned the React Native mobile app front-end for a coaching and badging platform, pioneering progress-tracking modules adopted by 3,000+ learners.
- Optimised bi-directional data sync between the mobile app and web dashboard, reducing state inconsistency bugs by 60% and improving perceived performance.
- Mentored 2 junior developers on React hooks, Redux patterns, and code-review standards, accelerating their onboarding by 4 weeks.

## EDUCATION

---

### Bachelor of Science — Computer Science

2014 – Jan 2019

Alexandria University, Alexandria, Egypt

Graduation Project: GTA Vice City clone built in C++ with OpenGL — Grade: A+

## SKILLS

---

**Frameworks & Libraries:** React.js, Next.js, React Native, Redux Toolkit, Redux Thunk, Redux Saga, TanStack Query, React Hooks

**Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3, Sass

**Tooling & Practices:** Git, GitHub, Postman, RESTful APIs, WebSockets, Responsive Design, SEO, SOLID Principles, Clean Code, Agile / Scrum

**Styling:** Tailwind CSS, Sass, CSS Modules, Styled Components

**Platforms & Deployment:** Tizen OS (Smart TV), Apple App Store, Google Play Store, Vercel, CI/CD pipelines

## LANGUAGES

---

Arabic (Native) · English (Professional)
